

## **Carpark Safety Advice**

Ex-cyclone Alfred was a very good test of the work we have done in the carpark and building to waterproof the property. The good news is that the building stayed dry and the drainage in the Wilton St carpark is much improved.

The bad news is that the rain damaged our neighbour's property, and this affects the Wilton St carpark.

There is an area, which we have marked with yellow tape, where the retaining wall is subsiding, and the fence is damaged. This creates a risk for parking in that area.

We are in discussions with the neighbour to rectify the problem. Meanwhile, please note that you have been advised about the risk and please take care when parking.
